Congress Overview

The Global Genomics & Personalized Medicine Congress 2026 will be held in the historic and dynamic city of Budapest, Hungary, bringing together the global scientific and clinical community, along with industry stakeholders, to advance precision healthcare through genomics, translational research, and personalized medicine.

Rapid progress in genomics, precision diagnostics, and data-driven medicine is transforming how diseases are understood, prevented, and treated. This congress provides an international platform for scientists, clinicians, bioinformaticians, industry leaders, and policy experts to share breakthroughs, exchange knowledge, and accelerate the translation of genomic discoveries into real-world clinical applications.

The event is designed to promote interdisciplinary collaboration, stimulate innovation, and address the scientific, ethical, and regulatory challenges shaping the future of personalized medicine.

Conference Objectives

- To highlight recent advances in genomics and personalized medicine
- To promote translation of genomic research into clinical practice
- To integrate bioinformatics, AI, and data science in precision healthcare
- To encourage collaboration between academia, healthcare, and industry
- To discuss ethical, regulatory, and policy aspects of genomic medicine

Conference Vision

The congress envisions a future where healthcare is personalized, data-driven, and evidence-based, enabling improved patient outcomes through genomic and precision medicine innovations.

Scientific Themes & Program Highlights

- Advances in Genomic Technologies & Methodologies
- Functional Genomics, Multi-Omics & Systems Biology
- Clinical Genomics & Diagnostic Applications
- Precision Oncology & Cancer Genomics
- Pharmacogenomics & Personalized Therapeutics
- Polygenic Risk, Complex Traits & Population Genomics
- Microbiome, Metagenomics & Host-Microbe Interactions
- AI, Big Data & Digital Precision Medicine
- Implementation Science, Global Access & Health Equity
- Ethical, Legal & Social Implications (ELSI)

Tentative Agenda Overview

Day 1

- Keynote Lectures
- Plenary Scientific Sessions
- Panel Discussions
- Networking Sessions

Day 2

- Oral Scientific Presentations
- Poster Sessions
- Industry and Technology Sessions
- Collaborative Discussions

Detailed agenda will be published on the official website.

Target Audience

The congress is designed for professionals involved in genomics, precision medicine, and personalized healthcare, including:

- Geneticists and Genomic Medicine Experts
- Clinical Geneticists and Genetic Counselors
- Precision Medicine and Translational Researchers
- Molecular Biologists and Systems Biology Researchers
- Bioinformaticians and Computational Biologists
- Multi-Omics Specialists
- AI and Genomic Data Science Professionals
- Pharmacogenomics and Drug Development Specialists
- Clinicians Applying Precision Medicine
- Pathologists and Molecular Diagnostics Professionals
- Public Health and Population Genomics Experts
- Regulatory Scientists and Policy Professionals
- Biotechnology and MedTech Industry Leaders
- Digital Health Innovators and Startups
- Early-Career Researchers, PhD Scholars, and Postdoctoral Fellows

Why Participate

- Gain insights from global experts in genomics and precision medicine
- Present and discuss cutting-edge research
- Network with international academic and industry professionals
- Explore emerging technologies and clinical applications
- Enhance professional development and collaboration opportunities

Venue

Budapest, Hungary

Budapest is a leading European destination for international scientific conferences, offering excellent connectivity, modern infrastructure, and a rich cultural heritage. The city provides an ideal environment for academic exchange, professional networking, and collaboration.

Participants will have access to a wide range of accommodation options and convenient transport facilities near the conference venue.

Contact Information

For all inquiries related to registration, abstract submission, sponsorship, exhibition, and general participation, please contact the organizing team using the details below.
